

ShopVibe - Quick Installation Guide

1. Requirements

- Python 3.8+
- Flask
- Stripe Account (for testing/production keys)
- Virtual environment (recommended)

2. Installation

1. Extract the contents of `ShopVibe_Installer.zip`.
2. Navigate to the root project directory.
3. Create a virtual environment (optional but recommended):

```
python -m venv venv
```

```
source venv/bin/activate (Linux/macOS)
```

```
venv\Scripts\activate (Windows)
```

4. Install dependencies:

```
pip install -r requirements.txt
```

5. Add your Stripe API keys to the `.env` file:

```
STRIPE_SECRET_KEY=your_key_here
```

```
STRIPE_PUBLIC_KEY=your_key_here
```

3. Running the App

Run the app using:

```
python app.py
```

The application will start on <http://localhost:5000>

Visit </store> to view the product store page.

4. Translation Support

The app automatically detects the user's browser language.

Supported languages: English, Arabic, French, Spanish

You can switch languages manually using the dropdown in the store/cart pages.

5. Stripe Integration

This project uses Stripe Checkout. Make sure to:

ShopVibe - Quick Installation Guide

- Use valid Stripe test keys (or live keys in production)
- Add valid products and prices inside `shop.json`

6. Customization

- Edit `shop.json` to add/edit products
- Modify templates in the `templates/` folder
- Update translations via `translations/{lang}.json`
