ShopVibe - Multilingual eCommerce Platform

Price: 7,000 MAD (~$700 USD)

Source Code: https://github.com/AHMED-debug582/ShopVibe_Stripe_Multilang

Tech Stack: Flask (Python), MongoDB, Stripe, Bootstrap

Delivery: Includes full source code + documentation + screenshots + promotional PDF

About the Project:

ShopVibe is a fully functional multilingual eCommerce store built with Flask and MongoDB,

integrated with Stripe Checkout. The project is designed to be developer-friendly,

easy to deploy, and globally adaptable with language and currency support.

Features:

- Multi-language support (English, Spanish, French, German, Arabic)

- Stripe Checkout integration

- Shopping cart system with quantity edit/remove

- PDF invoice generation per order

- Smart buyer analytics (frequent customers)

- Export to Excel (LibreOffice compatible)

- Email reports to admin

- Discount & coupon system

- Admin dashboard (with stats & controls)

- Login & Register system (email + password)

- Currency support by location (USD, EUR, MAD...)

Included:

- Full Source Code (ZIP + GitHub)

- Professional README.md

- Screenshots of UI (Store, Cart, Admin)

- Promotional PDF (for marketing/sales)

- Short overview video

- No live demo (but everything works locally or can be deployed easily)

About the Developer:

Name: Ahmed Madih

Country: Morocco

GitHub: https://github.com/AHMED-debug582

Download:

You will receive:

- GitHub access OR full ZIP package

- Deployment instructions

- Promotional assets (PDF + screenshots + video)

Ready to transfer immediately.

If you're looking for a multilingual, Stripe-ready store to resell, enhance, or deploy - ShopVibe is the

perfect starting point.
